

AAKASH CHANDRAKANT CHOUGULE

.NET DEVELOPER | WEB API & DESKTOP APPLICATIONS

Maharashtra, India | +91 7378331056 | aakashc549@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

.NET Developer with 2+ years of experience designing, developing and maintaining web APIs, MVC applications and Windows desktop software. Proficient in C#, ASP.NET Core, ASP.NET MVC, Web API, Windows Forms, ADO.NET, Entity Framework Core, LINQ and relational databases. Experienced in JWT authentication, API integration, debugging, query optimization and client-facing requirement analysis. Building an enterprise e-commerce platform using Clean Architecture, React.js, PostgreSQL, Kafka and Docker, with working knowledge of Azure, AWS ECS and CI/CD.

TECHNICAL SKILLS

.NET & Backend: C#, .NET/.NET Framework, ASP.NET Core, ASP.NET MVC, ASP.NET Web API, REST APIs, JWT, BCrypt
Desktop Development: Windows Forms, ADO.NET, Entity Framework Core, LINQ, data validation, exception handling, API integration

Frontend: React.js, JavaScript, HTML5, CSS3, Vue.js, Tailwind CSS

Databases: PostgreSQL, SQL Server, MySQL, MS Access; CRUD, joins, relational design, query optimization and migrations

Architecture & Messaging: Clean Architecture, layered architecture, dependency injection, repository pattern, Apache Kafka

Tools & DevOps: Visual Studio, VS Code, Git, GitHub, Postman, Swagger/OpenAPI, Docker; working knowledge of Azure, AWS ECS and CI/CD

PROFESSIONAL EXPERIENCE

.NET Developer | Vakratund Solutions | Pune

Dec 2024 - Present

- Developed and maintained ASP.NET Windows Forms, MVC, Web Application and Web API solutions for client-specific business operations.
- Built and integrated RESTful APIs with SQL Server, MySQL and MS Access; implemented JWT authentication and authorization for secured endpoints.
- Diagnosed production defects, optimized application logic and database queries, and delivered enhancements based on direct client requirements.
- Built responsive interfaces with Vue.js and Tailwind CSS, integrated frontend applications with backend services and supported end-to-end feature delivery.
- Worked directly with clients to clarify requirements, estimate tasks and coordinate timely delivery of application enhancements.
- Applied input validation, exception handling, reusable application logic and database-driven workflows to improve maintainability and day-to-day reliability.

.NET Developer Intern | ReapMind Innovation Pvt. Ltd. | Pune

Jun 2024 - Dec 2024

- Developed features for ASP.NET Windows Forms, Web Application and MVC solutions and integrated MS Access and SQL databases.
- Improved UI components, debugged application code and collaborated with development and QA teams to test and deliver assigned features.
- Used C#, Windows Forms and database connectivity to implement data-entry, retrieval and business-process functionality from requirements.

SELECTED PROJECTS

Enterprise E-Commerce & Order Management System | ONGOING

ASP.NET Core (.NET 10), React.js, EF Core, PostgreSQL, Kafka, Docker, JWT

- Designed a Clean Architecture solution with Domain, Application, Infrastructure, API, NotificationService, UnitTests and IntegrationTests projects.
- Implemented registration and login APIs using JWT, role-based authorization, BCrypt password hashing, dependency injection and seeded Admin/User roles.
- Integrated PostgreSQL through EF Core migrations for users, roles, categories, products and orders; validated endpoints with Swagger and Postman.
- Building Kafka-based asynchronous order and email notifications through a dedicated NotificationService.
- Preparing Docker-based environments, automated test projects, CI/CD workflows and deployment options for Azure and AWS ECS.

Inventory Management System

ASP.NET MVC, ASP.NET Web API, MySQL

- Built modules for store operations, stock monitoring and inventory tracking, with MySQL persistence and Web APIs for inter-module communication.

- Created user-friendly inventory updates, stock visibility and reliable day-to-day record retrieval.

Store Management System - Luxmi Traders

C#, .NET Windows Forms, ADO.NET, ASP.NET Web API, MySQL

- Developed desktop workflows for sales, inventory and customer records with database CRUD operations and API-backed component integration.
- Implemented validation, structured data-entry screens and reliable retrieval of day-to-day operational records.

Dairy Management Software

C#, .NET Windows Forms, ADO.NET, MySQL

- Built features for daily milk-production, sales, inventory and operational record tracking.
- Designed database-driven entry and retrieval workflows to simplify routine dairy-management activities.

Web Tools & Responsive Websites

HTML5, CSS3, JavaScript, responsive design

- Built and deployed a YouTube Embed Generator and drag-and-drop Image Format Converter with batch processing, aspect-ratio controls and dark mode.

CORE .NET DEVELOPMENT KNOWLEDGE

- C#: object-oriented programming, interfaces, collections, generics, exception handling, delegates/events and async/await fundamentals.
- Windows Forms: controls, event-driven programming, data binding, validation, reusable forms and database-backed CRUD workflows.
- ADO.NET: connections, commands, parameterized queries, data readers, data adapters, transactions and stored-procedure integration.
- ASP.NET Core: request pipeline, middleware, dependency injection, configuration, logging, model validation and global error handling.
- EF Core and LINQ: DbContext, relationships, migrations, tracking, queries and repository-based data access.
- REST and security: HTTP methods/status codes, DTOs, JWT authentication, role authorization, password hashing, CORS and Swagger testing.
- Quality and delivery: Git workflow, debugging, unit/integration-test structure, Docker fundamentals and CI/CD concepts.
- Design practices: SOLID fundamentals, separation of concerns, interfaces, reusable services and layered dependency flow.
- Application configuration: appsettings files, environment-specific values, connection strings and secure handling of secrets.
- API integration: JSON request/response models, consistent status codes, CORS configuration and frontend error handling.
- Performance fundamentals: asynchronous I/O, pagination, query projection, tracking choices and database indexing basics.
- Source control: Git commits, branches, repository organisation and maintaining clear project documentation.

DEVELOPMENT APPROACH

- Clarify business requirements, break work into manageable tasks and identify the required UI, API, validation and data changes.
- Design database entities and service boundaries before implementation to keep responsibilities clear and components reusable.
- Develop incrementally and verify endpoints, authentication flows and error responses with Swagger and Postman.
- Troubleshoot with breakpoints, exception details, application logs and database checks, then validate the fix against the original scenario.
- Maintain Git history and setup documentation and communicate progress, dependencies and blockers with clients and team members.

EDUCATION & CERTIFICATION

Master of Computer Applications (MCA) | Bharati Vidyapeeth | 2022-2024

Bachelor of Computer Applications (BCA) | Shivaji University | 2019-2021

Certification: ASP.NET MVC 5 - MVC architecture, controllers, views, models and database integration

Languages: English, Marathi and Hindi
